Virgin tint to darken

A. EQUIPMENT
1. Long or medium length mannequin heads
2. Combs: styling, rattail, wide tooth
3. Shaving foam, gloves, bowl and application brushes, applicator bottle, timer
4. Plastic shampoo cape, spray water bottle, sectioning clamps, gloves
5. Storage containers, plastic Ziploc bags, disposal bags, tape, a permanent marking pen or labels
6. Two towels, protective (base) cream, cotton
7. Demi-permanent (aniline derivative tint) and 10 to 15 volume Hydrogen Peroxide (H₂O₂)
8. Client consultation/record card

B. PROCEDURE
I. PREPARATION: italic text indicated the steps the day before the actual procedure
0. 24 hour allergy test (PD test) from the last visit (client consultation card and record card)
0. Client consultation: hair/hair color/skin tone/level analysis

1. Wash your hands
2. SMA / table set up
3. Wash your hands
4. Greet/seat the client. Check the PD test result. If redness or sign of affect, choose a different product
5. Drape the client: one towel underneath of the plastic shampoo cape, one towel on the top of the plastic cape.
   Be sure to drape cover the client and the back of the chair
6. Test the client hair’s condition: elasticity and porosity; hair texture; density
7. Fill out the client’s record card: condition of the hair, branch, tint #, operator, ...
8. Section the hair to 4 clean sections.
9. Apply protective cream around the hairline and the client’s ears
10. Put gloves on
11. Mix the tint
12. APPLICATION

II. APPLICATION
14. Start from the front sections
15. Subsection/parting/strand of the hair: 1/8” – 1/4”
16. **First application:** apply the tint on the bottom of the strand from the scalp hair to the porous ends (porous ends < 1 inch)
   Then apply the tint on the top of the strand from the scalp hair to the porous ends
17. Finish the two front sections and then apply the step 13 to 15 to the back sections
18. Go back to the front sections.
19. **Second application:** apply the tint to the porous ends.
20. Continue to finish the two front sections and then the two back sections
21. Set the timer according to the manufacturer’s instruction
22. **Strand test:** after 15 mins (time may vary depending on the condition of the hair and the tint mixture)
22. If the strand test shows a satisfactory result, bring the client to the shampoo bowl
23. Make sure to drape cover the back of the shampoo chair and the client’s hair laying down in the sink
24. DO NOT apply any water yet. Use the cotton and shampoo to remove the color around the hairline and the ears
25. Soap cap the hair: apply shampoo
26. Test the water temperature: take your right hand glove off (left if you are left-handed), hold the host with that hand and keep the head of hose down to the sink, adjust the water temperature. Do not use strong pressure at this time
27. Hold the hose firm and make sure the water runs over your little finger to test the water temperature all of the time
28. **Rinse** the nape first and then the ears and the hairline and all of the hair
29. **RINSE** and **RINSE** until the water run down clear
30. Apply a second **shampoo** if needed. RINSE and RINSE until the water run down clear
31. Apply the conditioner on the hair, not the scalp. Run your fingers through the hair
32. Rinse the hair with warm-*cool* water
33. Squish the hair gently from the scalp to the end
34. Use a clean towel to blot the hair gently, wraps the hair, lift the client’s head, set the client in the seating position for at least 30 seconds
35. Escort the client back to the station
36. Back to the sink, quickly clean up the sink
37. Style the client’s hair. Help the client viewing her/his hair
38. Collect the money and book the next appointment
39. **Complete the client record card:** processing time, color observation, correct the mixture if needed
40. **CLEAN UP**

**III. CLEAN UP**

1. Remove all hair and chemical out of the equipment
2. Clean up your station
3. Rinse the tools; wash the tools with soap and warm water
4. Dry the tools
5. Immerse the tools in the disinfection solution in 15-20 minutes
6. Use a tong or wear gloves to pick up the tools from the disinfection solution
7. Rinse the tools again
8. Dry the tools and store them in the sanitary container
9. Check your station and the sink again for the cleanliness
